EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

ABSTRACT:

The present invention relates to a roller for the thermomechanical treatment of a web-shaped medium, [said] the roller including: a roller body; axial bores for a thermal treatment fluid which are incorporated in [said] the roller body near to an outer surface of the roller body and into which [said] the thermal treatment fluid flows on an inflow side; inflow zones, formed on [said] the inflow side in the upstream ends of [said] the bores or in feed channels through which the thermal treatment fluid flows into the bores; and directing or guiding [means] portions provided in [said] the inflow zones, which transfer a rotational movement of [said] the roller onto the thermal treatment fluid, [wherein said] the directing [means] portions at least substantially completely transfer [said] the rotational movement onto the thermal treatment fluid and in this way suppress a relative swirl between the bores and the thermal treatment fluid, while still in the inflow zones.

2. The above changes to the abstract were made since the form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided.
